

### **Methods of Handling Injury or Sickness**

Article 1: To make sure that when they are sick or injured on campus, the faculty should be accompanied by witnesses to go to Health Office. If they can't go to Health Office themselves, they should notify us to evaluate and to handle. If they don't need to be sent to hospital immediately to be diagnosed and given treatment, the injured will be put to Health Center to rest and observe. If they need to be given emergency treatment immediately, call 119 and make use of the ambulance or the taxi to send them to hospital. Besides, the Military Office will contact their family and homeroom teachers, and personnel in Health Office, drillmasters and classmates will send them to hospital. These people will report the hospital location and the treatment in an hour.
